

Frequently Asked Questions

KDR and KLR Drive Reactors

1. What is the Short Circuit Current Rating for reactors?

Reactors are exempt per UL508A SB4.2.1.

2. Does it matter which way I wire through the reactor?

No, so long as you are consistent for all three phases.

3. What is the impedance of the KDR reactors?

KDR Low Z reactors are 3% and High Z is 5%. The output reactors are 1.5% Z.
